ITEM DESCRIPTION

Top quality waterproof jacket made of wind- and waterproof softshell with membrane of 10.000mm waterproofness rating and 20.000g/m²/24h breathability.

The used materials and accesories (waterproof zippers and threads) make this jacket a

perfect companion for trekking, biking and holidays trips, especially on rainy and windy days.

We equipped the jacket with four pockets with waterproof zippers including: two large front pockets, one small credit card pocket and one phone/mp3 pocket - both on a sleeve.

The regulated hood is equipped with a zipped softshell mask/balaclava that can be easily removed for washing - unique Face Protection System developed by GAGABOO.

Regulated bottom. Long cuffs with thumb holes keep the sleeve in place.

The jacket also has underarm vents regulated with waterproof zipper and large, side, waterproof zipper that facilitates undressing.

The print is unwashable and will never go off. Even after a long time the jacket will still have vivid colors. We know it, we've been testing it for years :-)

Available also as a waterproof, warm hoodie and thermoactive base layers.

100% thermoactive softshell polyester.

We recommend washing our products in max 40C with Nikwax or alike.

100% made in EU.
